

Electronic Room Controls

Minimize your energy consumption with electronic room controls

Electronic room controls are an efficient and reliable way to regulate the room temperatures in your home to suit your exact heating requirements.

Choose between standard easy-to-use dial room thermostats or programmable room thermostats that provide different temperatures at different times of the day: ideal for combi boiler installations.

Ask your installer about:

- RET230 – 24-hour dial thermostat
- TP4000 – 5/2 day programmable thermostat
- TP5001 – advanced programmable thermostat

Why choose Danfoss electronic room controls?

1. Reduced energy costs

- Small investment – short payback period
- Use intelligent electronic room controls and save up to 10% on your energy bill

2. Get heating only when you need it

- Programmable to provide heating that suits your needs
- Minimum amount of radiator heat required

3. Intelligent and user-friendly

- Adjust the temperature to your needs
- Attractive design
- Easy setting, simple operation

Achieve comfort and energy savings today
